

# REGIONAL MEDICAL CENTER BAYONET POINT

**R**egional Medical Center Bayonet Point has a history of providing the highest level of critical medical care for our community and the Pasco County region. The surrounding counties of Hernando and Citrus are in need of a trauma program to ensure that critically injured patients have access to treatment within the “golden hour” – that period of time immediately after a serious injury during which there is the highest likelihood that prompt medical treatment will prevent death. For the citizens of these counties, IT IS ABOUT TIME: that is, reducing the time it takes to gain access to expert trauma care within their own community. The development of a trauma program is a natural next step in the evolution of Regional Medical Center Bayonet Point and a very proud milestone that the entire organization is committed to achieve.
